

Cs106.2

Presenter Name : Mandeep Singh, sunny
Ghandhi & William Giles

Agenda

Project Description

COVID-19 applications typically aim to provide a range of features, including:

Vaccination Certificate Access: Allow users to download and access their digital vaccination certificates, providing proof of their COVID-19 vaccination status.

Symptom Tracking: Enable users to log and track their symptoms, providing valuable data to health authorities for monitoring and managing the spread of the virus.

Testing Information: Provide information on nearby testing centers, testing availability, and guidance on how and when to get tested for COVID-19.

Health Guidelines and Updates: Disseminate accurate information, guidelines, and updates from health organizations to help users stay informed and follow recommended practices.

Objective: These objectives collectively contribute to promoting public health, managing the spread of COVID-19, and enhancing user safety during the pandemic.

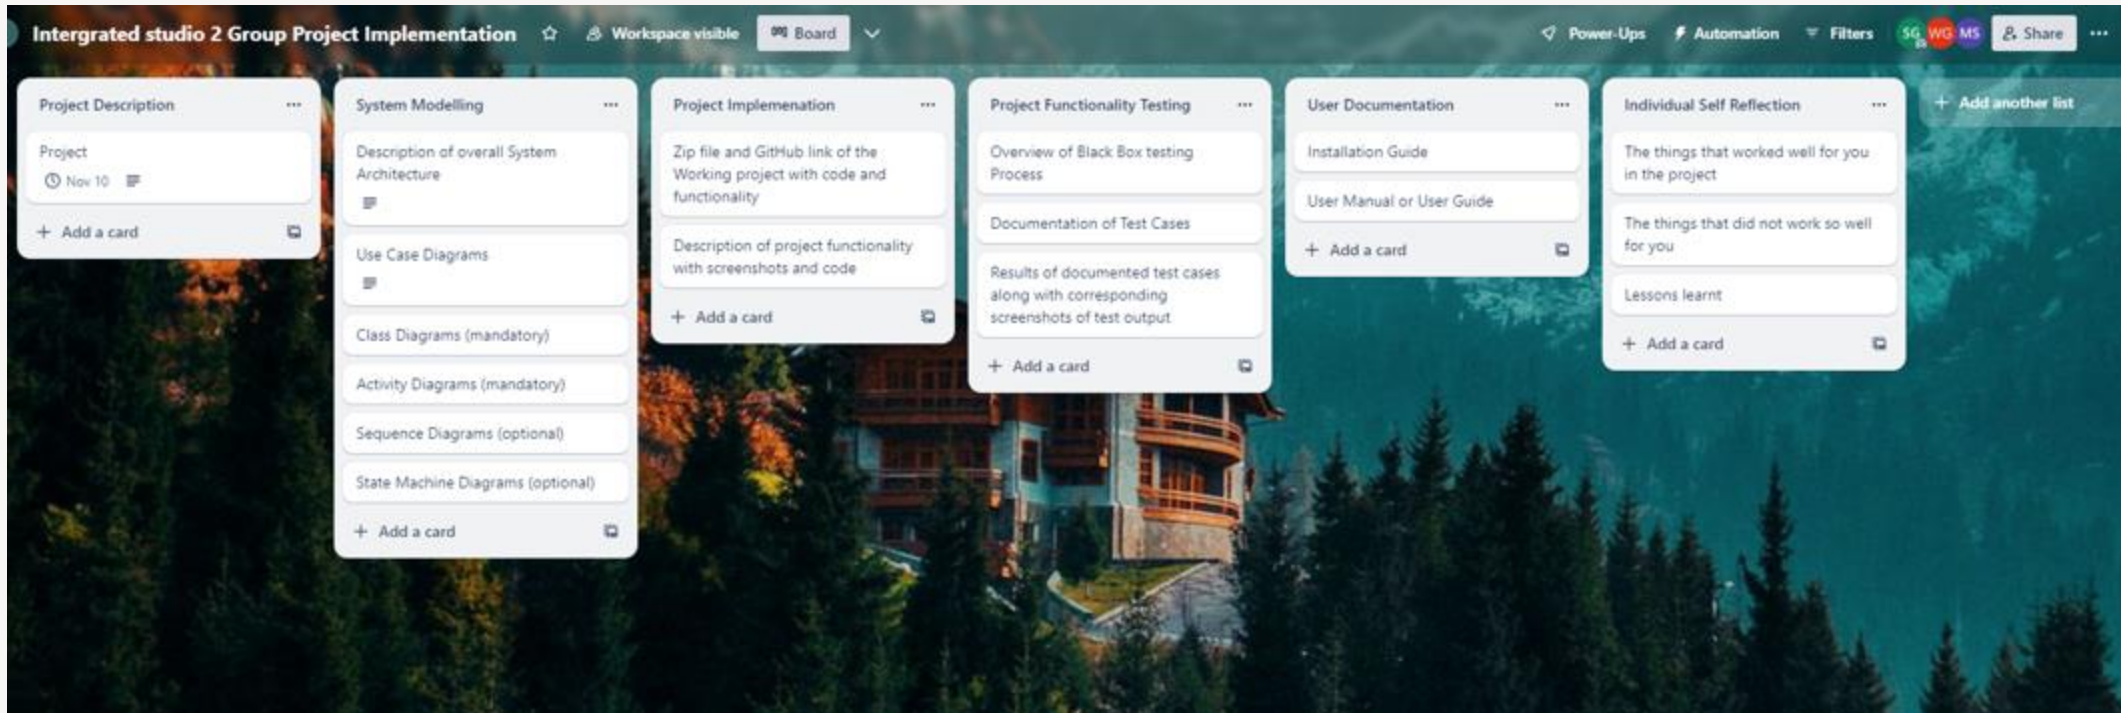

PRIMARY GOALS

Timeline and Project Constraints

We want to be fast and accurate with our research. We have strict time management goals to ensure things get done on time. Our plan for the first week is to have the project description done by 10 November. We will be using Trello to manage our timeline and will set appropriate date and times to be able to complete our tasks.

Roles

- Tools , technologies used.
 - Requirement specification
 - Lo-fi Wireframes.
 - Hi-fi Prototype.
 - Project implementation .
 - Designing our pages& presentation.
 - Survey.
 - .Xaml framework
 - Software Process model used and justification.
 - Project implementation.
 - System Modelling.
 - Coding on the xaml.cs file
-
- Goals and objectives.
 - Requirement specification.
 - Project implementation
 - System Modelling.
 - Coding on the xaml.cs file & Main Window.
 - Timeline

Plan for Application launch

Planning

Objectives, features,
design

Work

start work on our
plan

Design

Design ,lo-fi ,hi-fi
wireframes & xmls

Strategy

Foster Awareness
superior
methodologies

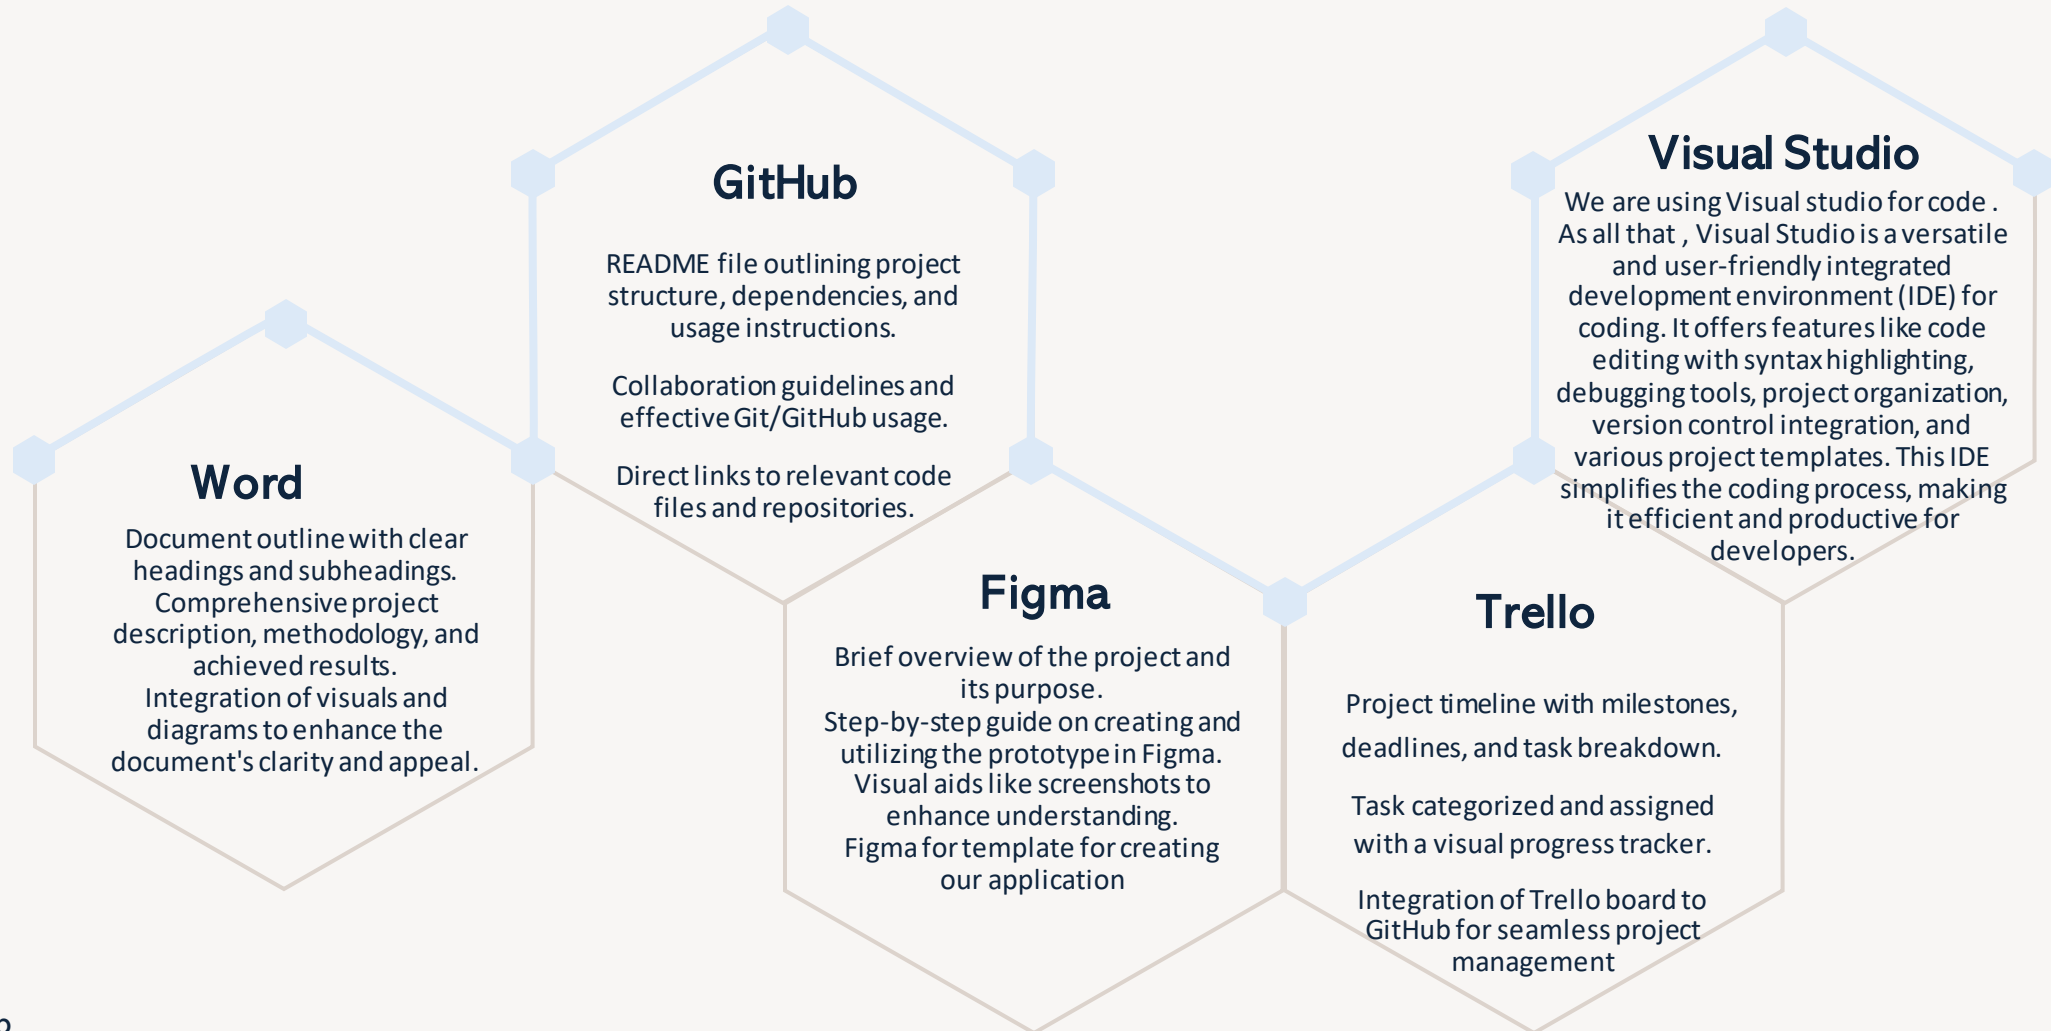

Launch

Deploy strategic
networks with
compelling
e-business needs

Plan for product launch

| Planning | Work | Design | Strategy | Launch |
|---|---|--|--|---|
| <p>Objective: Clearly state the goal of the application, such as providing real-time COVID-19 information, tracking cases, or offering resources.</p> <p>Features: Outline the specific features your WPF framework will include, like data visualization, user authentication, and interaction</p> <p>User Interface Design: Describe the intended UI layout, color schemes, and any specific design considerations for a user-friendly and visually appealing experience.</p> <p>has context menu</p> | <p>Define the project scope :Clearly state the purpose and scope of the Covid19 application .</p> <p>Identify Requirements: List essential features and function based on user needs</p> <p>Design UI: Start work rough design on our wireframes to check how app look like that . After that we work on Ux & took interviews form's different individuals about our application design which is overall satisfy for everyone .Although I start work on hi-fi design</p> | <p>As we all know that design plays a very vital role to make any application and website .</p> <p>Create lo-fi and hi-fi wireframes</p> | <p>Public Awareness:</p> <p>Develop features that contribute to public awareness and education about COVID-19. Consider integrating informational resources and guidelines within the app.</p> <p>Community Engagement:</p> <ul style="list-style-type: none">•Foster community engagement by incorporating social features or forums.•Encourage users to share information and expe | <p>Deploy strategic networks with compelling e-business needs</p> |

Tools

Areas of focus

Design

Responsive design : Optimize to accommodate the users accessing the site from smartphones.

User –friendly Navigation: Ensure easy navigation to key section like case updates, safety guidelines ,and vaccination resources.

Clear Information of Hierarchy: Arrange information logically, prioritizing critical details such as symptoms, prevention & vaccination information.

Features

Interactive Tools: Include tools such as symptoms checkers, vaccination appointment locators .

Accurate &Reliable information: Ensure that all information presented up-to-date, accurate.

How we get there

Figma

Brief overview of the project and its purpose. Step-by-step guide on creating and utilizing the prototype in Figma. Visual aids like screenshots to enhance understanding. Figma for template for creating our application

C# LANGUAGE

- Pursue scalable customer service through sustainable strategies
- Engage top-line web services with cutting-edge deliverables

Supply chains

- Cultivate one-to-one team members with robust ideas & collaborate the project we use GitHub

Problems we face

C# Language:

Difficulty navigating and implementing solutions in the C# programming language.

Relative Image Paths:

Challenges with defining and maintaining correct relative paths for images within the website structure.

Timeline Constraints: Pressure and difficulties adhering to the original project timeline.

Mandeep

The Problem

Improvise Adapt Overcome

In overcoming challenges faced in our COVID-19 website project, we express gratitude to our teacher, Lawrence, for teaching C# and providing instructional videos. We've embraced Visual Studio for coding and design, leveraging these resources to navigate complexities and enhance our project development

What we learn in this project

New Language (C#):

Gained proficiency in a new programming language, C#, expanding our technical skill set.

XML Framework:

Explored and implemented the XML framework, broadening our understanding of data structuring.

Teamwork and Collaboration:

Developed skills in teamwork and collaboration, fostering effective communication and coordination among team members.

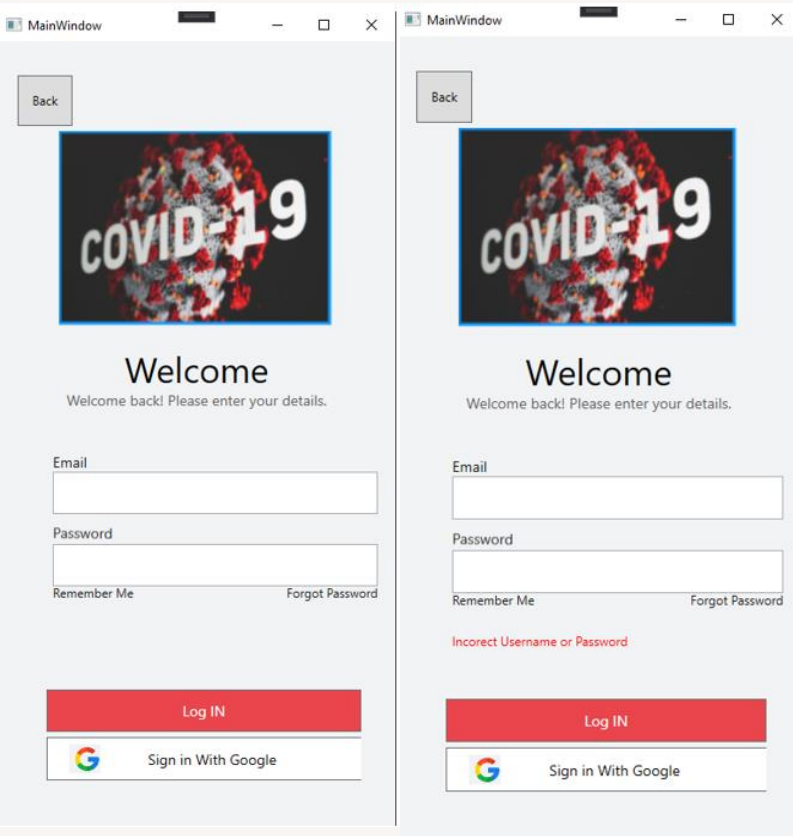

New Tools (GitHub, Trello):

Utilized new tools such as GitHub for version control and

Utilized new tools such as GitHub for version control and collaborative coding and Trello for project management, enhancing our project organization and efficiency.
